

The perfect way to add an HDTV Flat Panel to your RV.

Who are we and why did we do it?

The Flat Panel mount manufacturers think they have bigger fish to fry. They are not aware of the RV market requirements. We know what the RV market needs as we are RV'ers ourselves. HDTV RV Solutions is dedicated to serving RV'ers just like you. We have analyzed the structure of the RV and understand the stress it takes while in motion. Our robust solution protects your investment no matter how rough the road.

What can I do with an HDTV?

Watch Digital TV channels TV from an antenna!
Watch TV from a satellite!
Play your DVDs!
Use it to show trip pictures!
Play your PS3 or XBOX360!
Watch the big game!

Why do I need an HDTV?

In February of 2009 regular analog TV channels will be replaced with all digital channels? Once this happens, analog TVs will no longer receive programs from off-air antennas such as batwings. There will no longer be any analog TV Stations.

HD Locker ~ Patent Pending

The HD Locker® provides the unique installation of a 37" Flat Screen LCD HDTV in your RV. The HD Locker mounts firmly to the roof of the RV holding the HDTV close to the ceiling while in transit, then drops down for optimum viewing once parked.

Delivery and Installation is done at your local RV service center. We are teaming with new service centers every day. The HD Locker is easy to install and can be installed at any qualified service center. Once installed and connected to your TV, you will be watching your favorite shows at every stop.

How much space do I need? The HD Locker is 37" wide and 32.5" deep. The TV, once lowered, can then travel a set distance of 4-24 inches horizontally. This position can be selected so that the TV is locked in the perfect viewing position. The HD Locker is also designed so that the top does not have to be directly against the ceiling. This is so an AC Vent or other obstruction in the selected mounting location the HD Locker will not interfere with that part of your RV. The HD Locker is designed to accommodate any roof thickness from 3-8 inches.

Which TVs will work? The models that are currently qualified for HD Locker are the Sharp Aquos LC-37DU43U 37", the LG 37LC7D 37" with an optional mounting plate and the Sony Bravia KDL-32XBR4 32". More TVs will be qualified as they become available.

Where can I get it? Inquire if your RV Service Center is an HD Locker dealer. If not, have your service center contact us. A correct installation is important to us at HDTV RV Solutions, so the HD Locker should be installed at a qualified service center. If there are no service centers in your area simply call us and we'll get you "hooked up"

Safety: Engineering functionality and safety is our goal at HDTV RV Solutions. Our Award winning engineering team has ensured that each of the four mounting points can hold over 200 pounds without damaging your roof. The HD Locker requires only 25 pounds for support per mounting point. This 8 to 1 safety factor over the four mounting points ensures that the HD Locker is safe transport for the HDTV and your family.

Specifications:

- Height: 8"
- Depth: 32.5" extends and additional 24" in 4" increments
- Width: 37"
- Weight without TV: 62 lbs (28KG)
